Alphonse NKUBANA
Frontend Developer
 (**LinkedIn) |** (**GitHub**) | (+1)(612-636-3702)|(kubalpha1@gmail.com)|Blaine,Minnesotha,USA|Portfolio

Motivated and detail-oriented **Frontend Developer** with hands-on experience gained through intensive bootcamp training and realworld projects. Skilled in building responsive and user-friendly web interfaces using **HTML**, **CSS**, **JavaScript**, and **React**. Former **IT and Communication Specialist** with proven technical support, troubleshooting, and team collaboration skills. Contributed to curriculum development as a **practitioner**, demonstrating strong understanding of tech education and user focused learning. Committed to continuous learning and ready to bring creativity, problem-solving, and passion for clean code to a dynamic development team

Professional Experience

Skinstric AI   **Remote | August 2025 – sept 2025**
Frontend developer
 • Developed and deployed a React web application during internship, implementing UI from Figma designs, form validation, selfie/image upload in base64, and demographics analysis features. Built interactive components for correcting AI predictions, ensured tablet/mobile responsiveness, and styled with CSS. Managed API integration, Git/GitHub version control, and Vercel deployment..

Personal projects   **Remote | February 2025 – current**
Frontend Developer

- Completed an intensive frontend development bootcamp covering HTML, CSS, JavaScript, React, Git, and responsive web design.
- Built multiple real-world projects including an NFT marketplace, online library and online movie store.
- Practiced modern frontend tooling like React Router, Axios, Tailwind CSS, and GitHub for version control.
- I am familiar with working with RESTful APIs and implementing user interface animations. •   Designed clean, userfocused interfaces with a mobile-first approach
- Projects:
  - **NFT Marketplace**
  - **Online Library System**
  - **Movie Store Platform**

Full-Stack Web Developer (Personal Project)   **on-site | February 2021 – may 2022**
- Designed and developed a fully functional **multi-vendor e-commerce platform** to allow individuals to register, list, and sell products online.
- Built user authentication, product listing, search functionality, and shopping cart features using **PHP** and **MySQL**.
- Created responsive, mobile-friendly front-end interfaces using HTML, CSS, Bootstrap, and JavaScript.
  Implemented database structure for user roles (vendors/customers), product categories, orders, and transactions.
- Enabled dynamic content loading and form validations to enhance user experience and prevent errors.
- Focused on security measures like form validation, SQL injection prevention, and session handling.

MCT Global   **on-site |September 2019 - January 2021**
IT and Communication *Specialist*

- Supported the company's digital infrastructure including computer systems, software, and communication tools.
- Provided technical assistance to internal teams, helping to ensure efficient operations.
- Coordinated technical communication between departments and stakeholders.
- Gained experience in troubleshooting, team collaboration, and tech support — transferable skills to frontend debugging and client support roles.

Curriculum Development Practitioner   on-site May 2015-September 2018

- Participated in **curriculum design** for tech training programs, focusing on practical and industry-relevant frontend development content.
- Helped shape the learning experience for aspiring developers by reviewing and improving course structure, materials, and learning objectives.
- Applied deep understanding of how people learn tech skills, which enhances your ability to work in team-based and mentorship-driven environments.

Technical Skills

- Programming Languages: JavaScript, HTML, CSS,PHP
- Frameworks: React, Tailwind CSS, Firebase React Query, React Hook Form
- Tools & Other platforms: GitHub

Education:

Adventist university of central Africa (AUCA) | *Degree*   **June   2007 – September 2011** Bachelor's Degree in Information Science – Major in Information Technology

Frontend simplified   **February 2025 – August 2025** Frontend Development Bootcamp
